# THE BEST CO<sub>2</sub> IS THE ONE THAT WE DON'T PRODUCE!

## Why choose Hoffmann Green low-carbon cements?

To reduce the carbon footprint of wind farms, Hoffmann Green cements are the only 0%-carbon clinker cements under AteX A.

They enable immediate action to be taken to reduce CO<sub>2</sub> emissions from wind turbine foundations, both onshore and offshore.

## What is H-UKR cement?

- a carbon-free cement with a carbon footprint of 161 kgCO<sub>2</sub>eq/T, **80% less than CEM I**, while offering the performance of CEM II/A and the resistance to chemical attack of CEM III/A.
- a cement based on alkali-activated slag, with a **lifespan of 100 years**.

## A world first!

More than 630 m<sup>3</sup> of H-UKR concrete 0% clinker.

33 tonnes of CO<sub>2</sub> avoided.

32% less than with traditional concrete.
